Letter of Recommendation: Tanaka Chonyera

To Whom it May Concern:

I am pleased to write a letter in support of Mr. Tanaka Chonyera who is pursuing an undergraduate degree in Mechanical Engineering from the College of Engineering at Michigan State University.

I have had the pleasure of working with Tanaka for the past several months and have engaged in several conversations and coaching sessions regarding his career goals and aspirations. I am impressed by his maturity, focus, and commitment to learning. We have worked together on Tanaka's self-marketing portfolio including resume design, cover letter creation, and interviewing skill building.

I find Tanaka to be curious, brilliant, and quite enthusiastic about rocketry and space exploration. Tanaka has chosen to invest in skill development by participating as a team member within the MSU Formula Racing Organization and he is also employed as a research assistant with the Facility for Rare Isotope Beams where he has designed a high voltage divider for use in collinear laser spectroscopy experimentation.

Tanaka is articulate and his communication style is both engaging and inspiring. He has a rich story to tell about his tenacious pursuit of education, career plans, and contributions to the university. Tanaka brings a diverse set of skills and experiences to Michigan State University, and I am confident he will be a remarkable alumnus. I heartily endorse Tanaka Chonyera and invite you to reach out to me if you have questions about this amazing student.

Sincerely,

Jane L. Evarian
